

NIGHT VISION SOF CAP™

HEAD PLATFORM SYSTEM

THE 4D TACTICAL SOF CAP™ with an integrated visual-augmentation shroud is a comfortable, stable and secure head platform system that enables the use of night vision or other heads-up displays when the use of a ballistic or bump helmet is not required. Designed for long duration use, the SOF Cap™ balances weight, stability, comfort and ventilation. The SOF Cap™ is an essential kit addition for the modern Warfighter.

KEY FEATURES

- Features Galvion’s market leading Batlskin™ fit-band
 - Fit-band dial rapidly tightens the cap as needed, securing it with or without the use of a retention or chin strap assembly
 - Dial can be manipulated with one hand
- Exterior Velcro placement enables the attachment of beacons, strobes and other head-borne ancillary devices
- Compatible with most circum-aural communications systems
- Berry Amendment compliant

PHYSICAL CHARACTERISTICS

- **WEIGHT:** 250g - 400g (Configuration Dependant)
- **COMES IN ONE SIZE**
